***REASONS FOR ALLOWANCE***

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-17, wherein a lens barrel comprises a main optical system, a blur correction optical system, a lens holding frame, a blur correction drive unit, and a lock mechanism and (claim 3) a biasing device, wherein an optical axis of the blur correction optical system matches the optical axis of the main optical system when the movable engaging portion and the frame engaging portion are in contact with each other, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references are cited for disclosing an image blur prevention component in a lens barrel or lens frame, but unlike the present invention, these references do not disclose a main optical system, a blur correction optical system, a lens holding frame, a blur correction drive unit, and a lock

mechanism and (claim 3) a biasing device, wherein an optical axis of the blur correction optical system matches the optical axis of the main optical system when the movable engaging portion and the frame engaging portion are in contact with each other, as claimed: Imada (5881324), Imura et al. (5881325), Kamata (5883742), Imura et al. (5974270), Okazaki et al. (6718131) and Terao (20040057710).
